Smith & Wesson's modern facility in Springfield, MA.

Great traditions tend to be deeply rooted. The American tradition of owning and using firearms is an excellent example.

For 135 years, Smith & Wesson has been part of that tradition, making fine, innovative, functional handguns to satisfy the country's — and the world's — evolving needs.

But we don't take our acknowledged leadership position for granted. After all, a distinguished past is only a foundation for continuing, day-to-day excellence.

This involves an understanding of what your needs are today, a willingness to use the latest technology, dedication to quality — and a strong commitment to the shooting sports and firearms education.

Education becomes especially important if you're buying a handgun for the first time. Start by learning the procedures your town and state require for handgun ownership. Sources for this information include your city or town government, your State Attorney General's office, and your own lawyer.

Then learn the basics of how your handgun works and how to handle it safely. Organizations like the National Rifle Association (1-202-828-6000), the National Shooting Sports Foundation (1-800-458-3006), and your local sportsmen's club can help you get competent instruction. When you do, you'll learn more than handgun safety — you'll learn how to enjoy shooting.

And we can't think of a better way to keep a great tradition alive.

From handgun hunting to Saturday afternoon plinking, the shooting sports are not only thriving — they're growing. This past year, some 36 million Americans participated in some form of recreational shooting. For challenge. For excitement. And for just plain relaxation.

Pack a picnic, take a drive in the country — and spend the afternoon shooting. More and more American families are discovering that plinking is a sport they can enjoy together.

The fact is, shooting's *fun.* For openers, it's a great way for families to spend time together, as more and more of them are discovering. It's something the whole family can enjoy, too, because the basic skills needed are within the reach of just about anyone. And the whole family can get pretty good — even competitive.

Last year, more than a quarter million Americans actively competed in handgun matches, from local club shoots to huge national championships like the Bianchi Cup, the NRA National Bullseye Championships, and the Masters International. The three-discipline Masters, founded by Smith & Wesson, attracted 16 family groups in 1987 — along with a dozen women and ten Junior competitors.

Allen Fulford took home the championship at the 1987 Masters International, founded and sponsored by Smith & Wesson. This year 207 top shooters competed for more than $153,000 in cash prizes as nearly 8,000 spectators looked on.

Of course, handgunners aren't limited to honing their skills on metal targets. Handgun hunting for both large and small game is one of the fastest-growing participation sports in America. Ten years ago, only 27 states permitted any form of handgun hunting; this season, 49 did. And more than 3 million people took on the handgun hunting challenge in 1987, triple the number who went out a decade ago. The challenge seems to be the key: skillful stalking with a handgun is the best way to put the sport back in the hunt.

More than 3,000,000 people took on the challenge of handgun hunting this season. It takes stalking skill, patience, and endurance, as well as good shooting — but the payoff is excitement.

"Sport," in fact, is probably the main thing shooters have in common — although it's tough to generalize about a group as diverse as this one. On the whole, people who enjoy shooting prefer being outside *doing* things — fishing, hiking and camping. Typically, they're participants, not spectators.

If you think shooting is for men only, think again. More than 10% of America's recreational handgunners are women, and the number is growing — fast. So is the number of women that compete: an even dozen shot in the '87 Masters, 10 in the '87 Bianchi Cup.

Another thing: don't start out thinking the "typical" recreational handgunner is a man. About 10% are women — and that number is growing fast. But male or female, most share the traditional values of home and family: better than half have children at home. And, whether dedicated competitors or weekend plinkers, they view their shooting first as relaxation.

A lot of them have something else in common: they own Smith & Wessons. When asked, many said they bought their first Smith on a friend's recommendation; their second one because of personal experience. Nearly 75% of the people who buy our guns in a year already own at least one Smith & Wesson. Incidentally, about 70% of shooters who own other makes wind up coming back to S&W.

Of course, we do have a reputation for quality and performance, and we're upholding it. One way is through maintaining the high standards we've had through the years — without getting complacent. Our design engineers keep our guns under constant scrutiny, looking for ways to improve — and to develop. Another

Smith & Wesson has long been the overwhelming preference of law enforcement professionals. More than 40 state police forces use S&W revolvers, and some 500 departments have selected our semiautomatic pistols for duty.

is through introducing new products that are more than just innovative — they're sensible. The more than 30 new models we've introduced in the last seven years attest to that. The law enforcement community has always appreciated our no-nonsense approach, and Smith & Wesson continues to be the overwhelming choice of police forces across the country.

What is comes down to is that professionals, whether they're in law enforcement or competition, know what's good: they have to. And whatever their needs or specialties, the professionals choose Smith & Wesson.

We've designed this catalogue as an introduction to our handguns — the broadest selection of models you'll find. But the best way to get to know Smith & Wesson is to visit your local dealer and discover firsthand how S&W is keeping a great American tradition alive.

The first thing you liked about them was the sleek styling and clean, contemporary lines. A closer look showed you the high ammo capacity, easy reloading, and the excitement of rapid fire. So the decision to purchase a semiautomatic wasn't all that difficult. The hard part is deciding which one.

The fact is that there are more than twenty brands to sort through, not to mention hundreds of features and claims. Out of all that, what sets Smith & Wesson apart?

Start with safety. Smith & Wesson double-action semiautos have more safety features built into them than any other make — three of them, in fact. The most visible is the manual safety, also called a decocking lever, mounted on the slide. Inside, there's an automatic firing pin safety. And finally there's a magazine interlock system that prevents the pistol from firing unless the magazine is firmly in place.

Next, think about maintenance and reliability. Smith & Wesson autoloaders easily digest a wide variety of ammo without a hitch in their normal smooth function. Getting them down to the bare essentials for cleaning is a simple, three-step operation. And Smith & Wesson offers more models in easy to care for stainless steel than any other manufacturer.

Finally — maybe most important — let's talk about your preferences. The sole reason we offer more semiauto models than any other handgun maker is to ensure that there's one to meet your needs — and fit your hand. You can choose from two compact 9mms that are lightweight without sacrificing their full-size features; four full-sized nines with a choice of finishes, capacities, and sighting systems; and a stainless steel .45 with either fixed or adjustable sights. And that's just the double-action line.

If a single-action pistol is what you're in the market for, you'll be looking for out-of-the-box accuracy, crisp trigger pull, and beautiful balance. And with a Smith, you get them all. You can also pick your caliber — .22, .38, or .45 — for top precision or action shooting. Or you can opt for the high quality and sensible price of our premiere plinker, the Model 422.

All those qualities make our semiautos the first choice of well over 500 law enforcement agencies and regular major match winners. Those same qualities make Smith & Wesson the most logical choice for you. And the best one.

SMITH & WESSON SEMIAUTOS

SINGLE ACTION SEMIAUTOMATIC SPORTING & TARGET PISTOLS

It's true that not everyone who shoots is a pro, but it's worth noting what the pros shoot. When it comes to bullseye, it's Smith & Wesson. In the 1987 Masters International, for example, fully half the competitors used the Model 41 — right out of the box. They appreciate the accuracy that's built into these pistols — that are ready to go on the line without thousands of dollars worth of modifications.

It's also true that every pro was once a beginner, and there's no better way to begin than with our Model 422. It has a lot in common with our other target pistols, including construction that's strong but not bulky, easy maintenance, safety, and accuracy. But don't let its handsome finish fool you — the 422 is also very economical to own, as well as to shoot.

So whether your sport is afternoon plinking with the family or serious competition, there's a Smith to fit your hand.

103719	5"	S	8SH-AS-AMSF

Beauty and function. One often compensates for the lack of the other. But when it comes to the Smith & Wesson DA semiautomatics, the performance more than lives up to the sleek good looks.

For starters, competitors in rapid-fire events like pin shooting appreciate the high capacity, easy reloading, and dynamic balance — and the fact that these pistols can digest a wide variety of ammunition.

It's not that these semiautos are limited to match use. The same qualities that appeal to pro sport shooters — plus the unique three safety system — make them not only the choice of some 500 law enforcement agencies across the country, but also ideal for security at home. And the fact that there are four full-sized 9mms, two compact nines, and a .45 means there's a S&W semiauto that's comfortable for any hand, any shooting style, and any need.

Adjustable Front Sight — Exclusively from Smith & Wesson

It's the only sight of its kind available on a production handgun. You can preset this click front sight to four different settings (up to 200 yards), so you can quickly alter your sight elevation, not manually alter your point of aim. So whether you're shooting silhouettes or hunting, you can compensate for different distances or loads with a flick of the numbered dial — quickly, easily, accurately. Combine it with our adjustable rear sight and you have not only a sighting system with almost infinite possibilities, but perfect sight alignment even when the situation changes with very little notice.

It's a fact that one out of every two double-action revolvers purchased in the United States is a Smith & Wesson. The reason?

It starts with design proven by performance. Our revolvers have been tested over the course of more than a century, evolving as needs change and ammunition technology advances. The Smith you buy today, whether a new model or a modification of an existing one, retains its clean lines, balance, and sturdy, forged construction. When we make a change or add a feature, it's there for the sake of performance, not for the sake of newness.

And the result is pure function. From case-hardened hammers and triggers and smooth, hand-fitted actions to internal safety features and the built-in toughness to handle upwards of 10,000 rounds, our revolvers are constructed without compromise. Naturally, when you've been around as long as we have, you attract a number of imitators. But don't think that just because it looks like a Smith it's as good as a Smith. Law enforcement professionals recognize quality that can't be copied: more than 40 state police forces rely on S&W. Sport shooting professionals do, too. They like our out-of-the-box accuracy, and the fact that our revolvers can go on the line without a major investment in customizing.

In fact, your personal Smith & Wesson comes out of its box about as close to custom as you can get. You have a range of 29 revolver models to pick from, and more than enough sensible features to virtually build your gun to order — including barrel lengths, finishes, triggers, hammers, sight systems, and stocks.

When you come down to it, that's how a reputation is built: on good experience, both ours and that of the people that own our revolvers. Smith & Wesson revolvers have earned their reputation for style, quality, and performance — and we keep on living up to it.

You're not just going from Point A to Point B. You chose the long trail because you wanted to get out there and spend some time with nature. There's no denying it's peaceful — and exciting in a way that's hard to put into words.

But when you're remote from the distractions of the everyday, you're remote from its resources, too. And there are no guarantees that nature is always going to be as tranquil as you are. Encounter a pack of wild dogs — or something larger — around a bend in the trail and alone takes on a whole new meaning.

So you carry a Smith & Wesson — just in case things get a little more exciting than you really like. Our .22 revolver doesn't weigh much — less than a pound and a half — and it's compact enough to fit accessibly in the side pocket of your pack.

It's for keeping your hike as peaceful as you want it to be. That revolver isn't much weight on your back — but it could be a load off your mind.

Not every handgun is owned for sport — and that decision is a major one. You've given serious consideration to the responsibilities owning a personal gun entails and carefully assessed your particular need.

Once you've made the decision to make the purchase, there's still a lot to consider. Just because you need a revolver that's lightweight and compact, you shouldn't compromise on quality and power. And with Smith & Wesson, you don't have to. It's true that there are inexpensive .38 caliber revolvers that look like Smiths, but this is no time to take chances — not with reliability, with durability, or with careful details like shrouded hammers that can't catch on purse or pocket lining.

You've made a careful, responsible decision to purchase a handgun. So take the next logical step. Purchase it from a responsible company that stands behind its product — and gives that product the same careful consideration you gave your decision.

Home. No matter what happens during the day, it's the one place where you can put life back in perspective. You've worked hard to create this safe haven for yourself — and for your family. In a lot of ways, they're what it makes it all worthwhile. They depend on you, too. For comfort, security — and safety. And these days safety can mean more than remembering to lock up at night.

So you've given it a lot of thought and decided that a Smith & Wesson revolver has a place in your security arrangements. For nearly 100 years, our .38 calibers have been the overwhelming choice of law enforcement and military agencies around the world — for all the reasons that make them ideal for the home. They're easy to maintain, reliable, and — most important — simple to learn to use safely.

When it comes to a decision as important as this one, you won't want to rely on anything less than Smith & Wesson. Because of the people you come home to.

You're a long gun hunter — and that's that. You've given some thought to handgun hunting, maybe even tried it, but it's just not your sport.

But you also know there's a difference between a *hunting* handgun and a *hunter's* handgun. Because you can never tell when you might need that sidearm for backup — anything from dispatching wounded game to backup if your primary gun fails to function.

What do you look for in a hunter's gun? Carry-it-all-day comfort, reasonable weight and compactness, accuracy, and a caliber that it's easy to find ammo for even when you're off the beaten path. In other words, a Smith & Wesson.

The stages have names like "Triple Threat," "The Mover," and "Flying W." The sport is action shooting, where you push yourself to the limit in both speed and accuracy. And everything counts. With the money and prestige that are at stake, it's no wonder there's a lot of tension in the air — and a lot of Smith & Wessons on the line.

In the 1987 NRA Bianchi Cup, for instance, 134 competitors — 75% of the field — chose Smith & Wessons. Including the winner. The reasons? Out-of-the-box accuracy and smooth double action. Solid construction without excess weight, and indisputable reliability. Add that to a wide range of sight options, and you have a winning combination for the most demanding competition.

The Smith & Wesson .357 MAGNUMs®. They were the first — and you don't have to be a champion action shooter to see that they're still the best.

It's funny. You've always loved to hunt, but the last couple of seasons there's been something missing out there in the field. Maybe it's the *hunting.*

Putting the challenge back into the fall isn't difficult at all, as a steadily increasing number of hunters are discovering. All it takes is a Smith & Wesson MAGNUM®. Sure, you may have to do a little work on your stalking skills, endurance, and patience. But you'll also get back that excitement that lasts long after the hunt is over.

Handgun hunting. It's back to basics in the best possible way: just you, your game, and your Smith & Wesson.

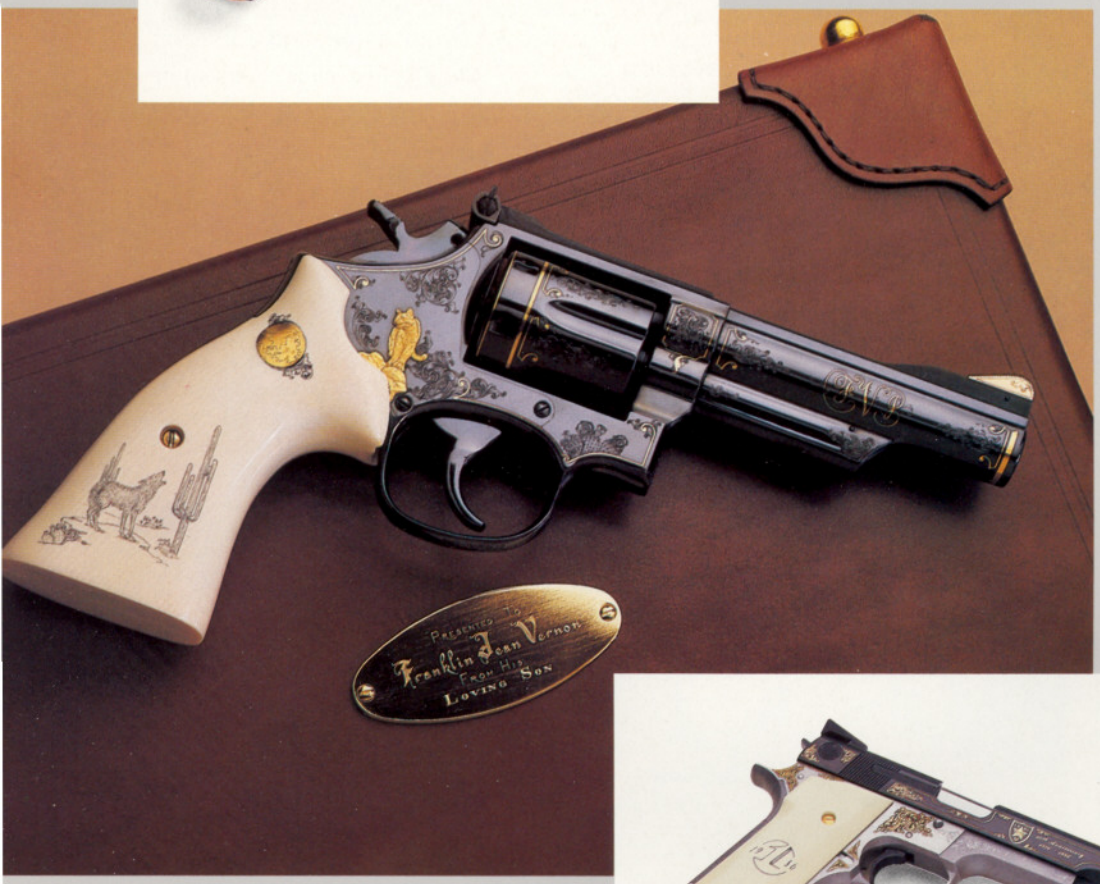
ENGRAVING

1st Issue Model 422
Engraved Gun



1st Issue Model 745
Engraved Gun

Custom Engraving

Custom engraving is available for any Smith & Wesson handgun. Beginning with your personal guidelines, our skilled engravers will provide research, sketches and quotes on having your pistol or revolver hand engraved to meet your requirements and budget. Personalized engraving can range from delicate scrollwork, Scrimshaw grips, emblems and scenes with gold, silver or platinum inlays to less expensive badges, logos, monograms, or lettering.

To obtain a quotation on your personalized style of engraving, contact your local dealer or Smith & Wesson for details.

"First Issue" Program

Smith & Wesson's "First Issue" program commemorates the introduction of any new entry to our product line. As one of the first models produced, each features the "1st Issue" logo, a low serial number, exceptional hand engraving and a customized presentation case, making these models an exceptional value for collectors.

If you appreciate the look of fine engraving, you may find that it's more affordable than you thought. Our skilled artisans can turn either your new or currently owned Smith & Wesson into a work of art with delicate scrollwork covering all, two-thirds, or one-third of your gun. And hand engraving of initials, monograms, emblems, or inscriptions can be incorporated into the pattern or engraved alone.

Gold-filled engraving of sideplates and barrels is also available to add a dramatic personal touch to your handgun.

To discover the possibilities, contact your dealer or the Smith & Wesson Engraving Department.

Smith & Wesson offers an assortment of accessories as well as factory-installed options that will enable you to customize a Smith & Wesson to your specific needs. All handgun accessories and service parts are available on a worldwide basis through Smith & Wesson distributors or directly from the factory.

How to Order Parts

Parts orders should be forwarded directly to:

Smith & Wesson
Parts Department
2100 Roosevelt Avenue
Springfield, MA 01102-2208

Telephone orders will be accepted with a limit of ten (10) items per order. Call (413) 781-8300, extensions 213 or 214. Collect calls will not be accepted.

Shipping and Payment

Smith & Wesson will not ship parts C.O.D. We will accept MasterCard, VISA, personal checks, on personal orders. Purchase orders and bill to agency will be accepted on all department orders. Merchandise will be sent via U.P.S. within ten working days upon receipt of order.

Magazines

Standard capacity magazines are available for Smith & Wesson Models 39/439/639, 59/459/659, 41/422, 52, and 645/745. High-capacity (20-round) magazines are available for the 59 and 69 series.

Presentation Cases

Choose from two solid mahogany presentation cases featuring the S&W logo and a universal-fit blue interior. Model 19044 fits any handgun with up to 6" barrel; Model 19045 for revolvers with an 8⅜" or 10⅝" barrel.

*Factory installation only **Round or square butts are available as accessories for all J, K and L frame sizes

As soon as we saw the prototype — lustrous blue-black and impressive as a Kodiak in the fall — we knew that no model number could ever live up to it. As it happened, the nearly 50,000 readers of *Shooting Times* who suggested names for the Smith & Wesson "Mystery Magnum" agreed. And out of that blizzard of cards and letters, one two-word description seemed to fit this unique .44 MAGNUM® from its full lugged barrel to its sleek unfluted cylinder: Classic Hunter.

Because that's exactly what it is. Smooth double action and crisp single action trigger pull. Weight in barrel and cylinder to minimize the recoil that comes with .44 power. Soft, non-slip rubber grips that really give you control. An adjustable sighting system geared for hunting distances — and hunting loads, with low-profile blades. All put together with the handgun hunter firmly in mind.

It's not a mystery any more. It's the Classic Hunter. From Smith & Wesson.
